

To Whom It May Concern, With regards to NAB petition 04-160, I must strongly urge you to REJECT this attempt by the NAB to strongarm a competitor who provides a superior product. I subscribe to XM Radio because I have to tolerance for the morass of bland, over-commercialized programming foisted on the public by mass media broadcasters. If the members of the NAB don't like losing market share to XM, then they need to come up with a better model, and compete or die. That is the very basis of the capitalist model that the United States is supposed to stand for. Again I urge the FCC to not play puppet to the NAB in this thinly disguised attempt to stifle competition in the free market.
